

More MOSCOW ICE!

Three new versions by **Kendall Johns**.

(Note: - In all cases the usual MOSCOW ICE! rules apply unless otherwise amended below).

-#-#-#-#-#-#-#-#-#-#-#-#-#-#-#-#-

1.

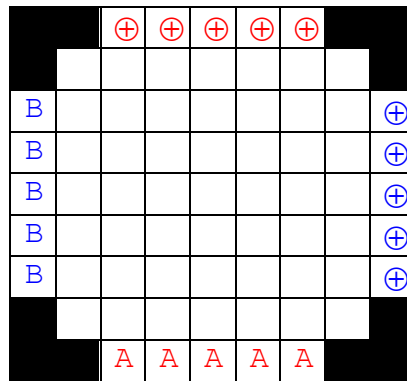

Maxi-MOSCOW ICE!

For Two Players.

Needed:-

2 different coloured IceHouse Stashes, (1 per Player).

A **9x9** squares per. the Board i.e. Three corner 'blanked' start/finish each). Dia.1.

board - Modified as standard **MOSCOW ICE!** squares in each off - This gives lines of 5 Spaces

Dia.1.

Rules: - Use all 5 Stacks otherwise play as Two-Player **MOSCOW ICE!**

Notes: - While developing **MOSCOW ICE!** I tested this version in order to use all the **IceHouse** stacks in a stash, and it worked very well. But, as (a): the 8x8

board is more universally available, also (b): I wanted to include the 4 player Option and, as any school kid will tell you, "2 into 5 won't go!" - I decided to stick with the 8x8 board. However this is still well worth trying.

If you wish to play this version but do not have a 9x9 board then you could use the 8x8 *Moscow Ice!* Board and play on the intersections - al.la. CHINESE CHESS or GO). In this case the Start/Finish lines are the outside edges.

2. MEGA-MOSCOW ICE!

For Two Players.

Needed: -

4 different Stashes, (2 per

A 10x10 'Continental' (Modified as above lines of 6 spaces

coloured IceHouse Player).

'Polish' or Draughts Board, to give start/finish each). Dia.2.

Dia.2.

Rules: -

Each player need 5 stacks of one colour and 1 stack of another - different from their opponents. (e.g. 5 RED and 1 ORANGE plays 5 BLUE and 1 PURPLE).

This single stack is called the Tzar and its pieces are called the Tzar Pieces.

The first Player sets their Tzar (A) on ANY space on their start line with the other Stacks filling in the remaining spaces.

Then the second Player does the same on an adjacent side - note that they do NOT have to Place their Tzar (B) in the same position as the first Player. (Example of possible layout-Dia.2.)

Dia.3.

Rules:- Using the **Mega-MOSCOW ICE!** Board will allow **Four Players** to play with 3 Stacks each. Example set-up - **Dia.3.**

Otherwise play as for Four Players, (or Partners), **MOSCOW ICE!**

{It would also be possible for **Six Players** to play with 2 Stacks each. e.g. [A][C][E][A][C][E] & [B][D][F][B][D][F]}.

With Six Players in a partnership game then there would be two teams of 3 players each. As above}.
